

# Urbanwood Blinds

NATIONAL  
BLIND  
SUPPLIERS

Urbanwood is an alternative wood product that looks and feels like real wood. Urbanwood is a polystyrene product that resists fading, cracking, discolouration and warping. It has a smooth finish on the slat. Urbanwood is completely moisture proof, so it is suitable for humid and wet areas such as kitchens and bathrooms where wood blinds are not recommended. The colour is always consistent, so the customer will always receive a blind that is the same colour as the sample they chose from. Urbanwood is also washable.

Urbanwood has a curved 83mm Valance which is made from PVC foam because co-extruded polystyrene does not work so well for complex shapes in thicker material. The bottom rail is also made from PVC foam. Both the Valance and Bottom Rail are painted and printed with the same design as the slat so they match perfectly. All the slats have undergone stringent heat testing and have achieved the following results; no distortion present between 48° and 60° and 1.5mm maximum movement between 61° and 71°.

1. Please deduct 10mm off the width and 15mm off the drop when ordering a "Recess" fit blind. Unless you specify that "NAM (No allowance made)", we will make all blinds to sizes you specify.
2. A **maximum width of 2700mm with Warrantee** for Slat, Bottom rail & Fascia
3. **Minimum Blind size is 180mm.** Blinds **under 400mm** carry a surcharge as per pricing table. These blinds are made by hand. These are not supplied with a warrantee. Please also be aware that blinds **under 250mm** will not have lift cord, these are tilt only.
4. Please advise if Face or Recess on the order form. This is for bracket purpose.
5. Minimum cord length is 500mm
6. For Butting blinds, please deduct 70mm off the butt blind for face and 80mm for recess.
7. Box Brackets come standard with blinds under 250mm in width otherwise they are \$7.00 pair and centre support brackets are \$2.20 each. Hold Down clips come standard with blinds under 400mm in width otherwise they are \$7.00 pair.
8. Common Headrails are not available but common fascia can cover two or more blinds up to 2800mm.
9. Also, please note: Cloth tapes have been discontinued except for white 50mm, however we have some leftover stock for your Urbanwood Blinds as illustrated below: Cloth Tape has surcharge of 20% on the blind price.

Colour 8000 for Slat colours Alpine White, Warm White & Linen

Colour 8028

Colour 8100

Colour 8018

10. Cutouts are available however, the **maximum cutout is 130mm**. Add \$25.00 for each cutout.
11. Colours available for **50mm Urbanwood** Alpine White, Warm White, Linen, Fog Grey, Spotted Gum, Tallowwood, Karri, River Teak and Ironbark.
12. Colours for **63mm Urbanwood** are Alpine White, Warm White, Linen and Spotted Gum
13. Valance is 83mm wide which allows complete coverage of the standard high profile headrail system.
14. Stacking height is approximately 15% of Drop
15. **Urbanwood** specifications

## Technical Data

Product Specifications	
Slat Thickness	3.2mm +/- 0.15mm
50mm Slat Weight	80-85 gms / 1MT
Valance	83mm curved valance
Bottom Rail	50mm x 15mm rectangular style
Slats Widths	50mm and 63mm

Maximum Blind Sizes	CordLock	V-Lift System
Max Width	2400mm	1600mm
Max Drop	3000mm	1800mm
Maximum m <sup>2</sup> (50mm & 63mm slat)		
Operable	3.6m <sup>2</sup>	2.9m <sup>2</sup>
Tilt Only	4.0m <sup>2</sup>	N/A

### Spacing - String Tape

Slat Size	Max Distance	Max between routs
50mm & 63mm	152mm	400mm

### Stacking Measurements for Fully Raised Blind

Height of Blind	800mm	1200mm	1600mm	2000mm	2400mm	2800mm
Raised with String Tape 50mm Slat	140mm	170mm	200mm	230mm	260mm	290mm
Raised with Woven Tape 50mm Slat	150mm	190mm	230mm	270mm	310mm	350mm
Raised with String Tape 63mm Slat	110mm	135mm	15mm	180mm	200mm	225mm

### Testing

**UV** - All Slats are coated with an acrylic UV top coat and are completely UV protected. In accelerated UV testing, all slats achieved a light fastness of 6-7 out of 8 where 8 features no colour change.

**Heat Resistance** - All the slats have undergone stringent heat testing and have achieved the following results; no distortion present between 48° - 60° and 1.5mm maximum movement between 61° - 71°.

**Plastic Testing** - Incoming plastic raw materials are tested for lead content on a regular basis. (Must be less than 200 parts per million, US standard, part 1303, Title 16, Code of Federal Regulations, Chapter II - Consumer Products Safety Commission of USA). All submitted samples have passed testing and content is well below permitted limits for safety.

### Colours

Alpine White 50mm & 63mm

Warm White 50mm & 63mm

Linen 50mm & 63mm

Fog Grey 50mm

Spotted Gum 50mm & 63mm

Tallowwood 50mm

River Teak 50mm

Karri 50mm

Ironbark 50mm

All slat, bottom rail and valance can be purchased in 2.9m lengths (colours Alpine White and Warm White in both 50mm and 63mm slat sizes are also available in 1.95m lengths), please refer to your price list for pack sizes.

- Slat cuts well and will not chip with 250/300 mm saw blade, type Z80.
- Punch holes do not crack or chip, provided punches are kept sharpened.
- To prevent scratching, we recommend opening boxes down the full length and removing the slat / rail / valance from the side of the box.

The Valance and the Bottom Rail are both made from PVC foam (more traditional faux wood material). They are better made this way, as co-extruded polystyrene does not work so well for complex shapes in thicker material. The valance and bottom rail are also painted, and printed with the same design as the slat so they match perfectly.

**NB:** There is no warranty for any blinds greater than 5 square metres.

## Urbanwood 50mm and 63mm Venetian Blinds

Effective Mar 2025
