

Internal Blinds — Database Report

NBS & Creative Wholesale Blinds
Generated: 09 February 2026 at 00:37

Executive Summary

This report provides a comprehensive overview of both NBS and Creative internal blinds data currently stored in the MCB SwiftQuote database. It covers the product hierarchy, fabric assignments and price groups, extras/components, motorisation options, and installation charges for each supplier.

	NBS	Creative
Products	7	1 (unified)
Fabrics	5 generic groups + 10 honeycomb	144 named fabrics
Price Groups	Group 1–5	Builder Range, 1–7
Extras Categories	6	8
Total Extras	31	47
Motorisation Options	2	17
Installation	Not configured	\$60 install / \$70 measure (nett)

■ Key Structural Observations

- 1. Creative Product Hierarchy:** Currently stored as a single product "Creative Internal Blinds" which covers Roller Blinds, Roman Blinds, and Panel Glides. In reality, these are three distinct product types manufactured by Creative, each with their own pricing grids.
- 2. Roman Blinds as Extras:** Roman Blind components (cleats, headboard upgrades, cord locks) are stored as extras under the category "Roman Blinds". However, Roman Blinds is a product type, not an extras category. These items should be components of a "Creative Roman Blinds" product.
- 3. NBS Uses Generic Fabrics:** NBS Internal Blinds uses 5 generic fabric groups (Group 1–5) rather than named fabric ranges. This is a simpler model where the fabric choice maps directly to a pricing tier.
- 4. NBS Missing Installation:** NBS does not have Installation or Measure Fee extras configured.

1. NBS Internal Blinds

1.1 Products (7)

Product Name	Pricing	Base Group
NBS Aluminium Venetian 25mm - Slimline	grid	1
NBS Aluminium Venetian 50mm - Wideline	grid	1

2. Creative Internal Blinds

2.1 Products (1 — Unified)

Creative Internal Blinds is stored as a single product. The PDF source (Creative Wholesale Blinds Pricing July 2025) defines **three sub-product types** under this umbrella:

Sub-Product	Fabric Groups	Has Own Pricing Grid	Status
Roller Blinds	Groups 1–7 + Builder Range	Yes	Primary product
Roman Blinds	Groups 1–2	Yes (separate grid)	Stored as extras category
Panel Glides	Groups 3–6	Yes (separate grid)	Not explicitly represented

■ *Recommendation: Split into 3 separate products — Creative Roller Blinds, Creative Roman Blinds, Creative Panel Glides — each with their own pricing grid, fabric subset, and relevant components.*

3. Comparison & Recommendations

3.1 Product Structure Comparison

Aspect	NBS	Creative
Product Granularity	7 separate products (Roller Screen, Roller B/O, Venetians, Honeycomb, PVC)	1 unified product (covers Roller, Roman, Panel)
Fabric Model	Generic groups (Group 1–5) No named fabrics for rollers	144 named fabrics across 8 price tiers
Sub-Product Handling	Each is its own product row	Roman & Panel Glide are hidden inside extras
Motorisation	2 options (Zero Gravity)	17 options (Somfy range)
Installation Charges	Not configured	\$60 install / \$70 measure
Pelmets	7 options (Linea, Sunboss, Wrapping)	7 options (Pelmet 95, Cassette, Padded B/O surcharges)

3.2 Recommendations

1. Split Creative Internal Blinds into 3 products:

- **Creative Roller Blinds** — Fabrics Groups 1–7 + Builder Range, Roller-specific extras
- **Creative Roman Blinds** — Fabrics Groups 1–2, Roman-specific components (cleats, cord locks, etc.)
- **Creative Panel Glides** — Fabrics Groups 3–6, Panel Glide-specific extras

2. Add NBS Installation Charges: NBS currently has no installation or measure fee configured. Consider adding these if MCB charges for NBS installations.

3. Reclassify Roman Blind Extras: Move the 6 items currently in the "Roman Blinds" extras category to become components of the new Creative Roman Blinds product.

4. NBS Fabric Detail: NBS uses generic group names ("Group 1 Generic"). Consider adding named fabric ranges if the PDF source provides them, for a better user experience in the quote builder.

5. Duplicate Pelmet 95 Entry: Creative has two duplicate "Pelmet 95" entries in the Pelmets & Valances category — one should be removed.
