

Screen/Holland Blinds

NATIONAL
BLIND
SUPPLIERS

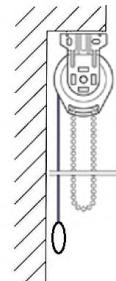

1. **Measurement of Screen/Holland blind.** All our roller blinds will be manufactured in width as pin measure (outside of bracket to outside of bracket) as illustrated below. Measurement is in millimeters (mm) and always width first then drop.

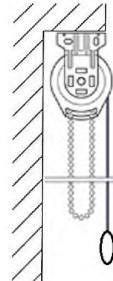

If you have a recess fit, we suggest that you order the blind at the tight fit measurement. This will fit perfectly from all the feedback we have had from you.

2. **Roll direction.** The standard or default for roller blinds is **standard or normal roll**, otherwise known as under roll or back roll. This means the fabric is coming off the back of the roller closest to the window glass. Specify Overroll if you require the blind to front roll or have the fabric coming off the front of the blind away from the window.

STANDARD ROLL

OVER ROLL

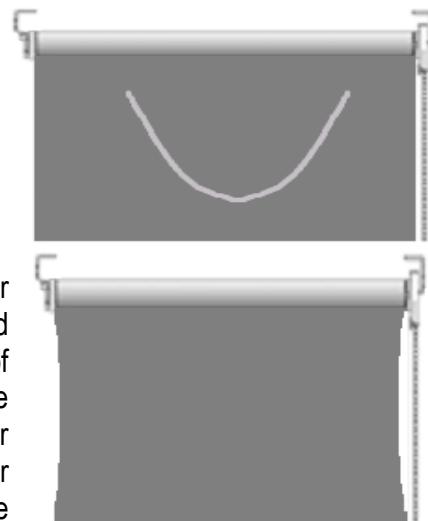

2. **Screen/Holland Blind Control.** All Screen/Holland blinds come **standard with chain control** and **metal chain**. The control mechanism we use is the Sunboss system. It is by far the world leader in chain drive roller blind systems. This is an evolving range and continues to grow and expand their component range. Chain lengths are specified in a chart at the end of this section. Plastic chains are also available at no extra cost. Plastic chain and control colors are White, Cream, Beige, Grey and Black. Stainless steel chains can be supplied at an extra charge of \$14.40. Please specify if required. A Direct drive chain control is fitted to blinds up to 2499 in width. Blinds 2500 and over in width are fitted with Gear Drive controls. You have the option to select Direct Drive Control with a Helper Spring/Spring Assist for an extra \$28.35. You must specify on your order if you wish to have this option.

Chain Control Colours

4. **Screen/Holland Sizes.** Minimum Blind width for a Chain Blind is 250mm. The maximum blind width we recommend is 3200mm. The maximum drop for a screen/holland blind we recommended is 3000mm. Any sizes larger than the recommended will not be covered by Warranty. Please note that small blinds occasionally track and do not roll up straight. Curling of fabric is more likely on smaller blinds also.
5. **Light Filter Fabrics.** Some light filter fabrics fray regardless of the way in which they are cut. We do not guarantee light filter fabric against fraying. You may request to have side hems on these which would attract an extra charge as set out below.
6. **Fabric Bagging or 'V'ing.** Larger blinds, both Hollands and screens could show fabric bagging or wavering. The width of the blind as well as the weight of the fabric contribute to this effect. Screen/Holland blinds wider than 2500mm and/or longer than 3000mm are more likely to bag. To reduce this effect, consider splitting the blind into several blinds or use 63mm tube. Soft backed fabric is more likely to bag.
7. **Fabric Railroading and Joining.** If the blind ordered is wider than the fabric roll width, it will be railroaded (fabric turned sideways). This often causes curling or cupping on the sides of the blind and is not covered by warranty. We do not guarantee that this will go away entirely over time so please make your customer aware. If the drop of the blind ordered is also longer than the railroaded fabric width, it will be horizontally joined. The join is sewn and therefore light pinholes may appear across this join.
8. **Side Hems.** We do not recommend or guarantee side hems on all polyester fabrics as they do not hang straight. We only apply side hems to Bonded Blinds (no cost) and light filter fabrics on request (extra \$18.00).
9. **Zero Gravity.** Zero Gravity control spring when installed gives the roller blind that weightless feeling when it is raised and lowered. Zero Gravity can be added as an option to your roller blind as either chainless operation and also used in conjunction with a motor (\$65.60) or with a chain control to allow operation through the lightest touch or movement (\$46.00).
10. **Helper Springs/Gear Drives.** Our pricing includes a Gear drive unit for blinds 2500mm wide and over as standard. You have the option of selecting a Helper Spring with a Direct drive instead. You must specify if you wish to have the helper spring instead on your order. Upgrade from a Gear Drive to Direct Drive with Helper Spring is \$28.35.
11. **Tube Sizes.** We automatically supply 38mm tubes for blinds under 2100mm in width. Blinds 2100mm in width or greater will be on 50mm tubes. We recommend 63mm tube for blinds over 2800mm, we leave that choice to you. There is an extra cost for tube and the larger control and pin end. When motorizing a Screen or Holland blind, a 50mm Tube is used. If the blind is under 2100mm wide, please add \$6/mt for the upgrade of the tube and \$3.80 for the extra adaptors.
12. **Linked blinds.** We recommend and guarantee two (2) linked blinds. Linked blinds will be treated as a single blind as far as tube sizing is concerned. If the combined width is less than 2100mm then a 38mm tube is used. When the combined width is 2100 or greater then 50mm tube is used and this will incur an extra charge along with the larger control and pin end. For sizes greater than 2500, a helper spring or Gear drive will need to be added and charged accordingly.

13. Extra costs for common accessories and components.

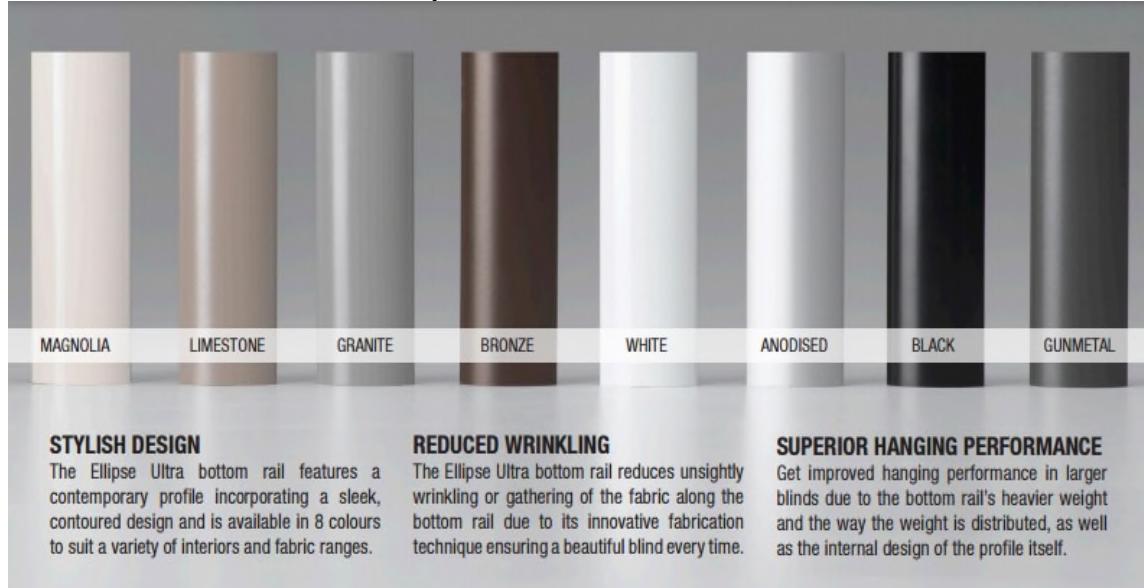

- ** Compact Double Bracket kit - \$15.50 available in (white, black, grey, cream and beige)
- ** Vertical BR-BR Double Bracket Kit - \$17.10 available in (white, black, grey, cream and beige)
- ** Multi-Link or Inline Link (no bracket) – \$35.50
- ** Heavy Duty 63mm Tube – extra \$11 per metre
- ** Wrapped Bottom Rail – extra \$15.75 per meter
- ** Rubber Insert for bottom rail– extra \$1.70 per meter
- ** Helper Springs/Spring Assists with adapter - \$33.25 each
- ** Single bracket covers 40mm - \$1.50 per pair
- ** Double bracket covers - \$6.05 per pair
- ** Universal link 0-75° set - \$148 No bracket (Universal joint coupling and adapters for each blind)
- ** Tassles - \$7.80
- ** Gold and Silver Rings - \$4.60 each
- ** Crochet pull Rings - \$4.60 each

14. Printing on Blinds. Please call the office for up-to-date pricing and fabric suitability.

15. Bottom Rail. Bottom rail comes in two profiles, Ellipse and Flat. We use the Hunter Douglas Ellipse bottom rail which is superior in quality, weight and has the option of a rubber rear insert. It comes in eight colours – Anodised, Black, White, Magnolia, Limestone, Granite, Bronze and Gunmetal. The Flat Bottom rail is from Blindware and comes in White, Black and Anodised. Both these bottom rails also have the option of a rubber strip insert at the back to reduce the noise when the blind hits the window. Further to that we have introduced a wrapped bottom rail where we use the Romatech no sew bottom rail to wrap the fabric around the rail. **Wrapped bottom rail** colours are White, Black and Anodised. This attracts an extra cost of \$15.75 per meter.

****Please specify bottom rail colour on your order. We do not match bottom rail on your behalf.**

Ellipse Bottom Rail Colours

16. Sunboss Fascia (Aluminium). Sunboss Aluminium Fascia is available to complement your blinds at a cost of \$29.40p/mt for 75mm Square, \$38p/mt for the 100mm Square, and \$47.70p/mt for the Double Curved. Fabric Wrapping for the 100m and Double curved Fascia is an extra \$18.90p/mt. Colours are Anodised, White, Birch and Black. Remember you can retrofit the Sunboss fascia over existing rollers, verticals and panel glides.

- 17. Linea Valance.** Linea Valance is available in two sizes, 98mm or 140mm. Colours available are White, Cotta and Black. The maximum single piece is 3600mm for all colours. Valance's greater than 3600mm will come in two pieces with valance joiners. If the valance is wider than the fabric to be inserted, the fabric will be joined on either side evenly with a full width as a centre panel. Please specify if you would like the fabric railroaded to avoid this. Railroading the fabric will incur a 25% surcharge. Price 98mm Linea Valance with any fabric insert at \$36p/mt and 140mm Linea Valance with any fabric insert at \$51p/mt. If the fabric is bonded or railroaded then inserted, the cost is an extra \$15p/mt.
- 18. Designer Pricing.** Hollands that fall within the Designer range are priced at Fancy plus 10%.
- 19. Elegant Pricing.** Hollands that fall within the Elegant range are priced at Fancy plus 20%.
- 20. Braid.** Please note, we only supply Sullivans 12mm Rayon Braid (ART:1462). You can supply any other type of Braid with your order. Fringing from Sullivans is also available in 75mm only.
- 21. Safety.** Each blind is supplied with a chain safe device which is designed to fix and tension the chain in compliance with child safe regulations.
- 22. Corner blind deductions.** If fitting blinds in a corner with one blind going through all the way and a butting blind on the other side, deduct 75mm for a blind using 40mm bracket, 85mm for a blind using 55mm bracket and 105mm for a blind using 75mm bracket. Both through and butt blinds will be on the same size tube.
- 23. Standard Chain Sizes (Screens and Hollands).** Chains are available in Plastic, Nickel and Stainless Steel. Maximum looped chain size is 3000mm. Any size above 3000mm and up to 6000mm can be made in Nickel or Stainless steel and will incur an extra charge of \$6.00. You can request different chain sizes on your order form if required.

Chain Size	Blind Size (Drop)
500mm	200mm - 800mm
750mm	801mm – 1200mm
1000mm	1201mm – 1500mm
1250mm	1501mm – 1700mm
1500mm	1701mm – 2200mm
1750mm	2201mm – 2700mm
2000mm	2701mm – 3000mm
2500mm	3001mm – 3500mm
3000mm	3501mm – 5000mm

SUNBOSS BETTER BY DESIGN

10 Year Warranty

Blindware Pty Ltd warrants that **SUNBOSS** clutches shall conform to **SUNBOSS**' specifications and therefore, when properly installed in a window covering, in accordance with intended category, diameter, size, weight and assembly practices, and when used in conjunction with other **SUNBOSS** components or previously approved components of other manufacturers, shall be free of defects in workmanship and materials under the normal use and service for which intended, for so long as the original purchaser owns the product. During the warranty period Blindware shall, at their expense and at their option, repair, replace or issue appropriate credit for any clutch that proves to be defective. Blindware's liability in such cases applies only to the clutch mechanism and does not extend to include any related costs or expenses incurred by replacement, repair or return. This warranty does not apply to any **SUNBOSS** clutch subjected to unauthorized repair or alteration, or to misuse or abuse. The warranty herein is in lieu of all other warranties, oral or written, express or implied, including but not limited to the implied warranties of fitness for use. In no event shall Blindware be liable for loss of anticipated profits or for special, collateral, consequential or incidental damages, direct or indirect.

INCLUDED IN THE PRICE

Tubes Sizes: 38mm Tube for all Blinds up to 2099 in width and 50mm for blinds 2100 or greater in width.

Blinds that are 2500 or greater in width will automatically have gear drive or helper spring.

Additional Roller components and prices

Effective Mar 2025

Things to check for:

When multi-link blinds are ordered there is an extra charge for the multi-link system

Extra charge when a specified finish is different to our listed finishes

- A Fancy finish with an extra is priced as Designer
- A Designer finish with an extra is priced as Elegant
- An Elegant finish with an extra is priced as Elegant plus 15%

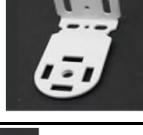

Blinds that are linked will need to go to 50mm Tube if the combined length exceeds 2099

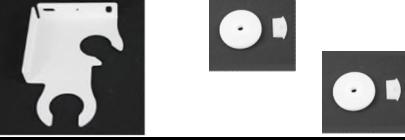

We suggest you use the same size tube for blinds that are side by side with sizes above and below 2099 mm

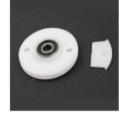

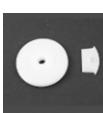

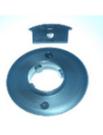

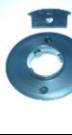

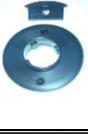

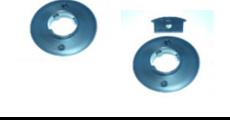

We suggest you use the same size tube for blinds that are butting with sizes above and below 2099 mm

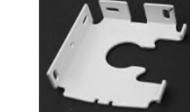

Term for connected blinds that operate together is Linked blinds using a (Multi Link) or (Inline Link) with insert

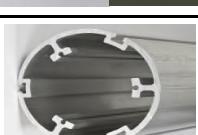

Blinds with common centre bracket but operate separately is Intermediate using Interdermediate bracket and insert
Bay or corner window linked blinds up to a 75 degree angle can use a Universal joint coupling as a link
